

CS 212 – Spring 2019 – Project 4

Assigned: 30 April 2019
Due: 14 May 2019
Cutoff: 14 May 2019 (midnight; no exceptions)

Create an Edit Menu in your GUI

Add a second menu to the GUI called *Edit* which will have one menu item called *Search*. Clicking on search should prompt the user using a JOptionPane input dialog to enter a car make. The GUI should then display only cars of that make. You will need to write a second menu handler called *EditMenuHandler*.

Create a jar file called **Project4.jar** and submit that to Blackboard by the due date for full credit.
